

**WELCOME****BOWERS METROLOGY GROUP**

## A word to our valued customers

In our 99th year, Moore & Wright is pleased to present our most global catalogue to date, encompassing over 2000 products manufactured in facilities in the UK, Germany, Switzerland and China. Regardless of manufacturing location, each product is guaranteed to be of the finest quality, just as you would expect from a product carrying the brand of a world-class manufacturer.

Moore & Wright is a member of the progressive Bowers Metrology Group, which also encompasses Bowers Metrology, CV Instruments and Coventry Gauge. These famous brands are all leaders in their field including three-point bore micrometers, hardness testers and screw thread measurement.

In order to serve our customers better and to become a "one stop" partner for a wide variety of products in the field of precision measurement, we have decided to widely enhance and complete the product line of Moore & Wright with a broad range of digital measuring tools such as micrometers, calipers and indicators. These items fully complement the products manufactured at our UK locations in Sheffield and Bradford.

Our global sales network, consisting of dealers and agents, located in almost every country in the world, offers you sales from local inventory, but also service and backup on all of our products. Our new European distribution centre in Maastricht, The Netherlands, offers a large stock for the convenience of our agents and dealers in geographic Europe, Africa and the Middle East.

With a focus on the future, we will respond to the needs of industry, which is demanding greater precision, improved speed and solutions for better efficiency.

This catalogue is available free of charge to you and is your opportunity to make the right choice for any of our equipment.

A handwritten signature in blue ink that reads 'Steve White'.
